DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ahn et al. (US 5,614,747).

Ahn et al. discloses a structure (see Figure 3E) of an Electrically Erasable Programmable Read-only Memory (EEPROM), comprising: a substrate 11 having a source/drain region 16; a tunnel oxide layer 12 disposed over said substrate; a select gate 20 disposed over said tunnel oxide layer, wherein said select gate is defined by a conductive layer covered with a first insulated material 22 thereon and comprises a sidewall made of a second insulated material 12; a single floating gate 13 aligned to one side of said select gate; a third insulated material 14 contacted with said tunnel oxide layer and said floating gate and disposed over said select gate; and a control gate 15 formed on said third insulated material, wherein said control gate 15 partially covers said third insulated material 14. Ahn et al. does not explicitly disclose the substrate 11 being a silicon substrate. However, it is well known in the art to form a substrate of silicon. Therefore, forming the substrate 11 of Ahn et al. of silicon material would have been prima facie obvious in order to take advantage of the lower manufacturing costs associated with silicon fabrication.

Art Unit: 2811

Regarding claim 12, each of said first insulated material 22, said second insulated material 12 and said third insulated material 14 is one selected from a group consisting of silicon oxide, silicon nitride and silicon oxide/nitride composite.

Regarding claim 13, said conductive layer 20 is one selected from a group consisting of polysilicon, amorphous silicon, recrystallized silicon and polycide.

Regarding claim 14, each of said floating gate 13 and said control gate 15 is one selected from a group consisting of polysilicon, amorphous silicon and recrystallized silicon.

Response to Arguments

Applicant's arguments with respect to claims 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2811

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
